

Why Support Princess Margaret Cancer Centre?

When You Donate to Princess Margaret Cancer Centre...

- You are supporting discovery and innovation by our scientific and clinical teams at one of the top 5 cancer research centres in the world.
- You are advancing discovery and innovation in cancer care not just at Princess Margaret Cancer Centre but across Canada and around the world.
- You are supporting World leading scientific discoveries such as:
 - Discovery of the stem cell by Drs. James Till and Ernest McCulloch
 - Discovery of the T-cell receptor (holy grail of immunology) by Dr. Tak Mak
 - Discovery of the cancer stem cell (colon) by Dr. John Dick and his very recent discovery of how blood is really made
- You are supporting World leading clinical practice changes for Canadians and patients well beyond our borders:
 - First to cure Hodgkin's disease using radiation therapy (Dr. Vera Peters)
 - Performed the first bone marrow transplant between unrelated donors (Dr. Hans Messner)
 - Introduced same-day rapid diagnosis and treatment planning for breast cancer patients (Dr. David McCready)
 - Launched the first comprehensive Canadian molecular profiling program to inform treatment decisions based on the profile of a patient's tumour (Drs. Lillian Siu and Philippe Bedard)

**40% of Canadians will hear the words “you have cancer”
at least once in our lifetime.**

Together, we can CONQUER CANCER IN OUR LIFETIME
